Sic Bo

How to play Sic Bo

It is believed that Sic Bo originated in the Port of Shanghai many hundreds of years ago. It has since become a firm favourite of modern casinos around the world. The brightly coloured layout shows all the possible combinations of the three dice after they have been shaken in a special tumbler.

The dice are tumbled and the layout lights begin to flash and you may now place your bets on whichever number(s) or combination(s) you think will show face up on the dice. The dealer shall call 'no more bets', lift the tumbler lid and illuminate the winning combinations. You win at the odds shown on the layout. Now isn't that easy!

Good luck!
